Network Designs, Inc. and Three Rangers Foundation

Network Designs, Inc. (NDi)

Network Designs, Inc. (NDi) is a Service-Disable Veteran-Owned Small Business (SDVOSB) that provides enterprise IT services aligned to our customer's missions and tuned to the latest industry best practices, focusing on bringing the best technology and solid approach to each engagement. We provide Health IT support for essential systems; we manage DevSecOps toolchains and cloud infrastructure; we engineer secure remote access communication solutions for critical information; we confront cyber security challenges; we build and maintain device-agnostic applications; we design engaging websites that deliver optimal user experience; we provide strategic communication and outreach; and we provide information management to support data-driven decision making for our stakeholders. NDi's President and CEO, Anthony Zeruto, was boarded by RCO Stan McChrystal and RSM Mike Hall. RSM Mike Hall tasked Anthony to stand up the first US Army Ranger Regiment Military Intelligence (MI) Detachment, followed by service as 3rd Battalion, 75th Ranger Regiment, MI Officer(S2), 75th Ranger Regimental S2, various Special Mission Units (SMUs), and culminating a 24-year career as Commander of NSA Georgia and then Director of Operations(G3), US Army Cyber Command. Anthony attributes any successes to the leadership academy that is the 75th Ranger Regiment.

Why "Veterans First"?

NDi is a "Veterans First" organization, and our commitment to hiring veterans is based on solid business reasoning. Veterans possess extraordinary qualities and experiences skillfully cultivated through their military service. The leadership skills they acquire and the discipline they embody are highly sought by NDi's customers (Federal Civilian Agencies, DoD, and US Intelligence Community). Being tested in high-pressure environments, veterans have consistently demonstrated their remarkable ability to think critically and tackle intricate problems head-on. These qualities are relevant and applicable to the duties and responsibilities of positions within Network Designs.

Network Designs Commitment to the DoD's SkillBridge Program

Network Designs is deeply committed to actively engaging in the highly beneficial Military SkillBridge program. This program is a remarkable opportunity for service members to transition their invaluable skills into civilian careers seamlessly. With the ability to initiate the process 180 days before retirement and utilize up to 120 days to engage with Network Designs, active-duty service members can make a smooth and progressive shift. The program's core objective is to empower candidates to demonstrate their exceptional skills while simultaneously providing Network Designs the chance to nurture and develop these Veterans toward potential employment opportunities. Our goal is to welcome transitioning service members into our team once they have completed the program, recognizing the immense value they bring.
